👤 PROFILE

A budding developer with about two years of experience in front-end tech stack. I have a strong web performance and functionality implementation. I am motivated to learn new skills with a passion for software development.

🧠 SKILLS

HTML

CSS

Javascript

Typescript

React JS

Redux Toolkit

Node JS

Nest JS

📁 PROJECTS

The Webfolio 🔗

- Developed a visually appealing and fully scalable website using react and JavaScript.
- Utilized React framer motion to enhance the overall user experience and engagement.

Fitness Club - A Fitness Web App 🔗

- A full fledged fitness web-app personalized for user to find the perfect exercises for them. It also suggests similar to the one user is looking for and videos on YouTube related to it.

YouTube Clone 🔗

- A fully working YouTube clone with a seamless video playback experience with the supports of all the YouTube features.

🎓 EDUCATION

BTech,

The LNM Institute of Information Technology

August 2018 – May 2022

Undergraduate in Computer Science and Engineering

📁 PROFESSIONAL EXPERIENCE

Metadome.ai, Software Developer UI

January 2024 – present

- Developed a Virtual Showroom Creator where I worked on integrating an unreal game with frontend, using real time communications with the game as well as iframe communications.
- Developed a face smash experience for Zepto on Holi. Collaborating with the graphics team to give the experience of making colourful face smashes without having to use colours. The product resulted in having 6 million users.
- Created a website for Hippo Homes, where one can configure 3D designs of kitchens and washrooms. This project also has a in-store installation where one can virtually go through these kitchens with the help of a socket.io connection between frontend and VR headsets.
- Developed a responsive application collaborating with AI and ML team to help buyers of any product (currently automotive) during the discovery phase. Built a scalable application which can onboard any client with just having to fill a JSON.
- Built an agent-customer interface to integrate with virtual showrooms to help customers connect with agents by integrating Agora SDK (for real time voice engagement) into projects and syncing UI with help of iframe communications to give the idea of screen sharing.

Roost.ai, Software Developer

January 2022 – January 2024 | Bengaluru, India

- Led the development of Roost's cutting-edge product using React and Nest JS, enabling clients to use AI technology in generating unit, functional, and non-functional test cases for their source code.
- Engineered an Environment as a Service (EaaS) and a dashboard, for clients to easily operate command line interface functionalities through a visually intuitive interface..
- Revamped UI and refactored state management using JavaScript object model and cleaned up existing code-base, resulting in a remarkable reduction in code complexity and decreased load time.

LiVert France, Web Developer Intern

May 2021 – August 2021

- Worked as a Web Developer for a French Startup Shopmate now known as LiVert France. LiVert France is a 100% free solution to get a free and more ecological delivery on all online purchases.
